

ABSTRACT

It is an object of this invention to provide a sea rescue informing apparatus and a life boat comprising the sea rescue informing apparatus. The sea rescue  
5 informing apparatus can securely inform a rescuer about the current position of a sufferer by continuously operating a rescue informing device with no fear of electric power consumption.

According to FIG. 1, the sea rescue informing apparatus includes at least a rescue informing device 12 having an illuminator 13 and a rescue signal generator  
10 17, and an electric power source 32 having a solar battery 33 and an electric charger 36 for supplying electricity to the rescue informing device 12. The rescue informing device 12 and the electric power source 32 are disposed in the sea rescue informing apparatus with light emission from the illuminator 13 and rescue signal  
15 transmission from the rescue signal generator 17 freely operated by electricity supplied from the electric charger 36 charged by electric power sent from the solar battery 33.
